NCS-30 NONCONDUCTIVE THREAD COMPOUND

DESCRIPTION

NCS-30® nonconductive thread compound is a premium quality, nonmetallic compound containing carbon based fibers and additives and other natural extreme pressure and anti-wear additives. These are blended into JET-LUBE's high temp calcium complex base grease. This new base grease offers the additional advantage of superior adhesion to wet steel surfaces, resistance to water wash-off, and most drilling muds. Especially effective for invert or high-pH muds.

- Excellent performance on high-chrome or nickel alloys
- · Contains no metals
- NSF H2 Registered
- Extreme-pressure additives provide additional protection against seizing and galling
- Nonconductive for MWD applications
- Provides maximum protection on Wedge Thread™* drill string connection designs
- High frictional properties ideal for casing drilling applications

NCS-30 is formulated to prevent excessive circumferential makeup by increasing the coefficient of friction under compressive forces. As stress levels rise above 50% of yield, the friction factor increases, limiting downhole makeup. Full hydraulic joint efficiency is maintained allowing joint shoulder faces to mate completely without standoff or deformation. NCS-30, with frictional properties similar to KOPR-KOTE®, has been all applications experience and prior knowledge should be used to adjust designed to utilize the makeup charts in API RP7G multiplied by make-up torque accordingly. its 1.15 friction factor on API connections. Premium drill string connections such as HI-TORQUE® (HT), eXtreme® Torque (XT®), and XT-M™ connections, etc., utilize make-up torques based upon PACKAGING thread compound friction factors of 1.0. Therefore, use the torque provided by the premium connection manufacturer. Adjusting makeup torque based on thread compound friction factor may still be advised. Friction factors for NCS-30 were developed using full scale API tool Joint connections.

- For a "Yellow"-rated product, use NCS-30[®] ECF™.
- Designed for optimum performance on all Rotary-Shouldered connections such as Tool Joints and Drill Collars. It can also be used on premium/proprietary thread designs such as Double-Shouldered, Wedge Thread™*, and other types of mechanical seal designs. It may also be used on certain non-interference tubing thread designs when properly torque compensated.
- * Trademark of Hydril Company

PRODUCT CHARACTERISTICS

Thickener Fluid Type Dropping Point (ASTM D-2265)	Calcium Complex Petroleum >450°F (230°C)
Specific Gravity, typical	1.30
Density (lb/gal), typical	10.95
Oil Separation (ASTM D-6184) Wt. % Loss @ 212°F (100°C)	<3.0
Flash Point (ASTM D-92)	>430°F (221°C)
NLGI Grade	1 ' '
Penetration @ 77°F (ASTM D-217)	300 - 330
Copper Strip Corrosion (ASTM D-4048)	1A, typical
Friction Factor *	
Relative to API RP 7G	1.15 (drill strings)
Proprietary Connections	Consult Manufacturer
Service Temperature	
Oilfield/Mining/Construction Drilling	-20°F (-29°C) to 500°F (260°C)
Industrial Anti-seize Applications	-65°F (-54°C) to 2600°F (1427°C)

Shelf Life: Minimum two years from manufacture date.

Many factors such as pipe size, thread geometry, drilling mud contamination, etc. affect the friction factor. This is a relative number and in

Code No.	Container Size	Shipping Wt.
16923	1 gal.	13 lb.
16913	2½ gal.	30 lb.
16915	5 gal.	48 lb.
16924	15 gal.	175 lb.
16929	50 gal.	589 lb.

LIMITED WARRANTY

Jet-Lube, Inc. makes the Limited Express Warranty that at the date of delivery this product shall be free from defects in Jet-Lube, Inc. materials and workmanship.

This Limited Express Warranty is expressly in lieu of any other express or implied warranties, including any implied warranty of merchantability or fitness for a particular purpose, and of any other obligation on the part of Jet-Lube, Inc.

The sole remedy for breach of the Limited Express Warranty shall be the refund of the purchase price. All other liability is negated and disclaimed, and Jet-Lube, Inc. shall not be liable for incidental or consequential damages
